

## #125 Pumpkin

Face Inks #125 Pumpkin is a beautiful shade that does NOT contain a lot of titanium dioxide. This means that when added to warm up a brow or a lip shade, it does not create a chalky effect. Some pumpkin shades contain a lot of white which distorts the colors that you add it to, however Face Inks #125 Pumpkin boasts a minimal amount of white (titanium dioxide).

### For Brows:

Face Inks #125 Pumpkin is a true orange that can be used on brows and lips safely. As a corrector, #125 Pumpkin is very effective due to not having a lot of white in it. You will get a great correction for black eyebrows with #125 Pumpkin!

### For Lips:

#125 Pumpkin can be used straight in the lips for a beautiful result! Alternately, a few drops of #125 Pumpkin added to a cool or deep lip shade will prevent bluing. #125 Pumpkin can also be used as a corrector for blue or purple lips.

### The Beau Lip Scale:

Rose Marie has created her own lip scale called "The Beau Scale". The Beau Scale ranges from 1 to 6, much like the Fitzpatrick Scale for skin. 1 would be a very pale lip, practically without color while 6 would be a very dark lip such as Whoopie Goldberg's. Remember that adding pumpkin to cool lip colors can prevent bluing, especially if the client's lips are a 3-4 on The Beau Lip Scale. When the client's lips are beyond a 4 on the Beau scale, only a lip line is recommended, otherwise the degree of blue in the lip will simply prevent any color from showing and risk turning purple or black.
