Midnight Plum**

**Rose Marie's tips for beautiful eyeliners for every client;**

I am loving the **5-Power** Needle. It is *necessary* to turn your machine speed up to 150 to drive this needle group. I have found the **5-Power** to be much faster at filling in wide eyeliner and for creating beautiful very quick bottom eyeliner. I also use it for a fast lash enhancement.

The movements I use are as follows:

- I draw; which is a back and forth drawing or etching motion to create my template.
- I move in a very tight circular motion to fill in wide eyeliner.
- I do pointillism for soft bottom eyeliner.
- I do a drawing motion for more intense bottom eyeliner.

If my client has a lot of sun damage on her top eyelids and wants a wider eyeliner, I may use a **3-Outline** to trace my template and then proceed with the **5-Power** to fill in the top eyeliner and stay with it for the bottom eyeliner.

**Call today at 1-888-763-2328 or visit us online  
at [www.beauinstitute.com](http://www.beauinstitute.com) to order these or  
any of the other Face Inks pigments and  
permanent makeup supplies.**
