

## **Pigment of the Month: Cocoa**

*On sale for \$15.00, regularly \$25.00*

**Face Inks Cocoa** is the perfect eyebrow shade to use when you want a deeper, warmer brown.

I mix it with half Coffee Bean and love the warmth it comes back with, especially on a Fitzpatrick 3 to 5.

Maintaining a dark, warm brown has always been challenging before Cocoa.

Cocoa can be added to many of the Face Ink eyebrow shades. Add a few drops to Moccasin or Sandalwood to deepen them.

Another application of Cocoa is to line lips with it on a Fitzpatrick 4 to 5. It heals to a beautiful Cocoa shade.

I use a larger needle configuration such as a 7-Liner with this much melanin in the skin and I don't drag the color onto the vermillion of the lip. This avoids the risk of too much color or possible bluing in the vermillion.

*Face Inks colors are very heavily concentrated with pigment particles for thickness, not glycerin, so it can safely be diluted with a drop of distilled water.*
