

**Pigment of the Month:  
Naked**

*On sale for \$15.00, regularly \$25.00*

**Naked is one of our most popular lip shades. It can be used straight and is the perfect and safe selection for your clients that want a soft and natural lip color.**

**Naked heals beautifully on both warm and cool complexions. Although it appears slightly warm, once it is tattooed into the lips it cools off to a neutral shade.**

**I love using a few drops of Naked to soften some of the brighter colors such as: Java Mauve, Plumberry, Lovers Coral and Cayenne. It lends a fleshy, natural tone to these shades.**

**Naked is great for those from 1 to 3 on the Fitzpatrick Scale. It may not be deep enough for darker complexions but can be mixed into a deeper shade to soften and/or lighten it.**

***Remember...always mix your lip formula and place directly onto the vermilion and allow it to dry. If you see that it is drying too cool, lighten your color or add a drop or more of Pumpkin.***

***Face Inks colors are very heavily concentrated with pigment particles for thickness, not glycerin, so it can safely be diluted with a drop of distilled water.***
