

## Coffee Bean

**Coffee Bean** is quickly becoming a favorite of Rose Marie, Debi, and Bonnie.

Check out their tips and tricks:

As a gorgeous eyebrow shade, create beautiful dark **eyebrows** on darker skin tones. Fitzpatrick 4 thru 6, using **Coffee Bean** and 1 or 2 drops of Pumpkin #125. Use a #4 Flat or #3 Outline for hair strokes and remember you can use the #4 Flat to shade, making sure the needles are horizontal, in between the hair strokes.

**Tip:** For warmer tones you can add Cocoa #690 and/or Henna #640 along with Pumpkin #125

Create a natural **beauty mark** using the same formulas as described above. The needles they use for a beauty mark are #3 Power or #3 Outline. Great for skin tones from Fitzpatrick 3 thru 6.

**Coffee Bean** can create a beautiful, natural and smoky upper and lower **eyeliner**, using the color straight. The smudge is made by using a #5 Magnum or #7 Liner.

**Tip:** Softer smudge can be done by dipping the needle with pigment into distilled water.

Are you getting requests for “**guy liner**”? **Coffee Bean** used straight is perfect. Use a #3 Liner, with pointillism technique. This can add dimension and a great frame on most men’s eyes. Control the intensity based on the amount of pigment you implant between the lashes.

**Tip:** Coffee Bean can be added to any FaceInks eyebrow shade to darken without changing the color.

FaceInks colors are very heavily concentrated with pigment particles for thickness, not glycerin, so it can safely be diluted with a drop of Distilled Water.

**Call today: 1-888-763-2328 to order Coffee Bean or any of the other Face Inks pigment and permanent makeup supplies.**
