

## In the Navy #405

**In the Navy** is one of three new eyeliner shades that Face Inks is proud to add to our fabulous collection of pigments. Along with **In the Navy**, we have added **Purple Rain #403** and **Midnight Plum #401**.

**In the Navy** used on hazel or blue eyes is stunning. Create a rich navy shade by adding a drop or 2 of Onyx Black into **In the Navy**.

### Rose Marie's needle tips for all your eyeliner clients;

**#5 power needle** is fast becoming one of my favorites. Creates a dense liner with softness. Works well on both top and bottom liner. Movement can be pointillism, either tight or loose circular motion and drawing. Machine speed 150 (required for all power needles).

**#3-Point Liner**; Most popular needle used for solid eyeliner. Machine speed 130.

**#3 –Point Power**; dense color with a softness. Machine speed 150.

**#3- Point Outline**; Great for outlining eyeliner on tough or sun damaged skin we would suggest that you do not complete an eyeliner with 3-Outline. Machine speed 120-130.

**#5-Point Shader** will create a much softer eyeliner than the 3-Liner. Machine speed 120-130.

**#5-Point Magnum**; Advance needle grouping. A great shortcut needle for lash enhancements, narrow or wide eyeliners, shaded or smudging effects on eyeliners.

**Call today: 1-888-763-2328 to order In the Navy or any of the other Face Inks pigment and permanent makeup supplies.**

Face Inks colors are very heavily concentrated with **pigment particles for thickness, not glycerin**, so it can safely be diluted with a drop of Distilled Water.
