

**Pigment of the Month:**  
**Face Inks Cherry Cola**  
only \$22, regularly \$27

It's finally Spring! The Cherry Blossoms are blooming and Face Inks **Cherry Cola** is flying off the shelf!

Why? *Because, it is extremely popular for:*

- **Hair stroke and powder eyebrows**
- **Micro-Stroking (Micro-Blading)**
- **Scalp Micro-Pigmentation**

Cherry Cola is a deep, warm based brown that maintains its warmth in the scalp and in Micro-Stroking, where it is difficult to achieve. When Cherry Cola is used straight it may heal a bit cooler, depending on the client's complexion or Fitzpatrick. Always place your color on the area you are working and allow it to dry. If you see it requires more warmth add drops of Cocoa or Henna. This will make it both warmer and/or brighter.

**Needles:**

Cherry Cola has gained popularity with small needle configurations:

Single Needle

Single Micro

3-Micro

All Micro-Stroking (Micro-Blading) needles

**Topical Anesthetics:**

I pre-numb brows and scalps with 4-5% Lidocaine for 20 minutes. I proceed to make my sketch on the eyebrows and then **very swiftly** apply 3 layers of the following for complete comfort. I call this my swift triple play.

Layer 1: Duration Ultra and Magic (mixed together 1/2 and 1/2)

Layer 2: Apply a thin coat of Super Trio

Layer 3: Apply a thin coat of Vaseline.

**Immediately wipe them all off and proceed.** It is incredible how quickly this layering takes effect. I may reapply my triple play another time through the procedure if I see my client is becoming uncomfortable.

I place small amounts of Super Trio and Vaseline on the back of my glove so I can swipe and wipe very quickly or place them in the small areas of my sweetheart ring.

**Sweetheart Rings** are the best invention since sliced bread! Wearing these rings will save your neck and shoulders from aching after a busy day. No more reaching over to your table for your pigment and topical anesthetics. You will feel the difference after just one day of use. Be sure to order a few today!!!
