Lover's Coral is our featured lip pigment for April!

Rose Marie's tips on Lover's Coral;

Lover's Coral is a fabulous **NEW** lip shade! It is the perfect color for summer and is a beautiful shade that can be used on both warm and cool complexions. Great on skin tones in the Fitzpatrick range from 2-4 and the BBI scale 1-3.

Rose Marie's tips on **Lover's Coral #512**;

Create a soft, natural coral lip line using Lover's Coral straight with a #7 Liner needle group. You can also shade the lip interior with the same needle in a circular motion.

Achieve a deeper coral-pink lip line with a #3-Outline needle group. If natural lip shade is a BBI-2 or BBI-3, you can add 1-2 drops of New Pumpkin. Swipe mixed color over lip and allow drying. This allows you to see the depth of color. Shade lip interior with **Lover's Coral** and a drop of **New Pumpkin** using a #9-Magnum needle group either in a circular motion or straight strokes depending on how much shading you want to achieve.

Create an earthy coral-pink with **Lover's Coral** and **Brown Sugar**. Use a #5 shader for lip line and use a #9 magnum to brush down color for blending.

Lover's Coral can be added to many shades to create fun new colors.

Face Inks colors are very heavily concentrated with pigment particles for thickness. These colors can be safely diluted with a drop or 2 of distilled water.
