Face Inks Pigments are manufactured in the United States, using the highest quality colorants available in the industry, resulting in excellent color retention and superior results. Face Inks Pigments have been streamlined for simplicity, allowing you to achieve any shade with the least amount of color mixing. Each shade has been designed and tested by permanent cosmetic professionals, who collectively have more than 40 years of color knowledge and experience.

Micropigmentation Machines NOUVEAU CONTOUR®

The Intelligent provides the practitioner with state-of-the-art computerized technology. It is equipped and controlled by an Intel microprocessor "chip." The Intelligent's central processing unit offers the most advanced features, which allow for the selection of pre-programmed settings for various procedures, i.e. eyebrow, eyeliner, lip color and medical procedures.

Software installed in the central processing unit, the operating system of the Intelligent, consistently calculates the best needle frequency (speed) needed to achieve optimal pigment retention. Skin structure varies according to the location because the structure and tolerance of the skin is different for each area of application.

The Intelligent has more power than any other rotary device. The needle frequency can be adjusted from 50 to 180 punctures per second. This allows the practitioner more flexibility in needle groupings. With the increased power, the practitioner is able to perform every type of cosmetic and medical procedure available.

Nouveau Contour Intelligent - \$3495.00

Nouveau Contour Digital 1000 machine with Whisper-touch™ control. The sleek new handpiece plugs into console via a USB plug like a computer.

The 1000 can power up to 150 insertions per second. Use your favorite Nouveau Contour precision cartridges and adjust the power with a touch of your finger for every situation from the finest eyeliner skin (you know that rice paper thin skin in some mature clients) to the most stubborn scars.

Stable needle frequency results in perfect pigment color retention. Touch-ups have become almost obsolete.

Nouveau Contour 1000 - \$2795.00

The Nouveau Contour Intelligent and the Digital 1000 both come standard with the Safety Handpiece.

The hand piece is equipped with a patented Safety Needle Cartridge, worldwide this is the first permanent make-up "rotary/pen" machine that guarantees no chance of cross contamination.

To achieve the best results on different skin types and with individual techniques the hand piece is designed to change pigmentation depth. The hand piece is made of die cast aluminium and is extremely light. It comes standard with a Zero Tolerance system. You will never experience any sideward fluctuation of the needle. Hair strokes look more natural, lines look sharper and procedure time is reduced. The Safety hand-piece is equipped with an Easy-Click system, which allows for quick attachment or detachment of Nouveau's patented Safety Needles. This leads to fast changes between needle configurations, or use of various pigment colors.

Nouveau Additional Handpiece - \$995.00

Each Machine comes with a 3 year warranty on the control unit, and a 2 year warranty on the handpiece.

Each ml Contains: Lidocaine 5% in emollient base

Lidocaine 5%

LMX 5% is a 5% lidocaine ointment. LMX can be used to numb eyebrows or lips before a procedure.
45 g tube - \$50.00

Magic Gel

Use Magic to numb eyes and lips during a procedure.

1 oz bottle - \$34.99

Each ml Contains:
 Lidocaine 5%,
 Tetracaine 2%,
 Epinephrine 0.02%.

Swipe

Use during eyebrow and lip procedure, not appropriate for eyeliner.

4 oz bottle - \$40.00

Each ml Contains:
 Benzocaine 60mg
 tetracaine 15mg

Duration Ultra

Duration Ultra is a liquid topical anesthetic that works best when used after the skin is broken.

1 oz bottle - \$40.00

Each ml Contains:
 Lidocaine HCl 40mg
 Tetracaine HCl 20mg
 Epinephrine HCl 0.5mg

Tag #45

For use on eyebrows, lips and areola during a procedure

1 oz bottle - \$39.00

Each ml Contains:
 Lidocaine HCl 40mg
 Epinephrine HCl 0.4mg

Numpot

Use on Eyebrows and lips before procedure and on lips during procedure

1 oz jar \$49.00

*5% Lidocaine
 pain relief formula*

DOTC Blue

Use on Eyebrows, lips and Areola before and during procedure.

15 g jar \$39.00

*3% Lidocaine,

Hash marks for ml, cc, oz,
and DRAMS
\$2.99

Nouveau Contour Safety Needles

Rule: Fewer needles in a round configuration travel deeper into the skin than larger round needle groups. Smaller round needles groups, since they travel deeper, will cool off your colors. Depth cools color. Be sure to warm up your brow and lip colors, adequately, when using these smaller needle groups.

The more needles in a round configuration, the blunter they are. They will not implant color as deeply into the skin as the smaller round configurations, so your colors will be more apt to heal with more warmth.

I recommend practice pads for trying out new needles, before you use them on a client/patient's face or body. Craft Foam is available at Michael's Crafts or A.C. Moore. It is a great material that allows you to see the effects of each needle and will show you what happens when you turn one the wrong way or even press too hard.

- **1-Point Liner \$110**
Used for **very** fine hair strokes, dry needling scars, camouflaging thin scars and creating subtleties. **Movement:** used to draw hair strokes, pointillism.
- **3-Point Micro \$155**
Extremely fine gauge of needles that amount to a slightly thicker single needle. Use the same as a 1-Point Liner. Also, great for scalp-scars and to sharpen a lip line at the end of the procedure. **Movement:** used to draw hair strokes, sharp lip line, and pointillism.
- **3-Point Outline \$155** Heavier gauge than the 3-Micro but finer than the 3-Power.
Great for outlining eyeliner on tough or sun damaged skin (but do not recommend completing eyeliner with 3-Outline), coarser hair strokes and outlining lips (but do not recommend completing lips with 3-Outline), scalp scars and fine scars. **Movement:** drawing, sketching, pointillism.
- **3-Point Power \$155**
This exciting **NEW** configuration is a heavier gauge and more rigid construction than the 3-Outline and is much like a standard coil tattoo needle. It is an incredibly exacting tool that is great for eyeliner and lip liner or a more solid brow. **Movement:** drawing, tight or loose circles, pointillism. **When using Power needles, you must turn your machine up to 150.**
- **3-Point Liner \$125**
Most popular needle for solid eyeliner and solid eyebrows. Use for drawing and densely filling in. **Movement:** drawing, tight or loose circles, pointillism.
- **3-Point Slope \$155**
Perfect for hair strokes, the 3 S lope needles create a true tapered eyebrow hair effect. **Movement:** Set the speed on your machine to 130 and use an in-and-out motion through the skin.
- **4-Flat \$155**
This **Advanced FLAT Needle** is a shader that packs color in when the needles appear horizontal and are used in a tight circular motion. When used as a FLAT, it is great for filling in lips, scars or areola. When turned vertically, you can simply draw through the skin to produce a fabulous hair stroke. If you haven't used this advanced tool, you may want to take a class on it and/or practice your movements on Craft Foam.
Movement: circular for shading wider scars, lip interior or areola complex. **Do not line lips with this needle.** When drawing hair strokes move slowly through each stroke counting from at least 5 to 10 depending on the length of the hairs.

Nouveau Contour Safety Needles

5-Point Slope \$155

The 5 Slope needles are similar to the 3 slope. Works well for longer, tapered hair-strokes and is a great tool for men's eyebrows.

5-Point Shader \$155

Most popular needle to create a soft, powdery brow, great for lining lips and will create a much softer eyeliner than the 3-Liner. Extremely versatile, it can also be used for areola tattooing & camouflage. **Movement:** drawing, pointillism, tight or loose circular motion.

5-Point Power \$155

This **NEW** configuration is a heavier gauge and more rigid construction than the 5-Point Shader and is more closed so it creates a stronger line. Used for lining lips, eyeliner, areola, camouflage, solid brow. **Movement:** drawing, pointillism, tight or loose circular motion. **When using Power needles, you must turn your machine up to 150.**

5-Point Magnum \$155

An **Advanced Needle** that consists of 2 rows of flat needles. Magnums are also referred to as under-and-over needles. They are a great shortcut for lash enhancements, narrow or wide eyeliners, shaded or smudging effects on eyeliners, lip interiors, scar camouflage and areola. A magnificent shading tool that is easier to navigate than the 9-Magnum around the eyes. **Movement:** tight or loose circular motion, pointillism, fanning out.

7-Point Liner \$155

Creates a very soft effect for eyeliner, lip liner, brows and areola. Great for double color eyeliner when used for the second or lighter shade. Creates a non-conspicuous lip line. **Movement:** drawing, pointillism, tight or loose circular motion.

7-Point Power \$155

This **NEW** configuration is a heavier gauge and more rigid construction than the 7-Liner and is a bit more closed. Can be used to line lips, create a soft eyeliner or brow. **Movement:** drawing, pointillism, tight or loose circular motion. **When using Power needles, you must turn your machine up to 150.**

9-Point Magnum \$170

An **Advanced Needle** that consists of 2 rows of flat needles. Magnums are also referred to as under-and-over needles. Can be used for lash enhancements, wide eyeliner, shaded or smudged edges on eyeliner, lip interior (full lips), scar camouflage & areola tattooing. **Movement:** tight or loose circular motion, pointillism, fanning out.

Areola Complex Tattooing Training DVD \$249.00 (using digital machine)

Learn Areola Complex Tattooing With Our Training DVD's

Experience the most gratifying facet of your permanent cosmetic career.

Rose Marie Beauchemin of The Beau Institute in NJ and Debbie Guastella of the Guastella Institute in New Orleans, present this 7-hour, 6-DVD instructional series

This intensive para-medical course includes:

- Live model demonstrations on various types of breast reconstruction, reductions and grafts.
- Amazing areola complex tattooing techniques that create the illusion of nipple protrusion.
- Techniques in diffusion that allow for perfect matching on a unilateral mastectomy.
- Booklet that repeats the process and includes terminology.
- Questionnaire that will assure your comprehension of all materials.
- Certificate that states you have achieved a passing grade on the questionnaire.

This series has been hailed as the most extensive and comprehensive DVD training program, worldwide.

This training course is not meant to substitute your state requirements or that of our non-profit organizations.
