

December Pigment of the Month: "Hot" Cocoa

**Want your brows to stay Warm? Cocoa will keep them warm!
Great for Microblading too!!**

Face Inks Cocoa is the perfect eyebrow shade to use when you want a deeper, warmer brown.

Cocoa can be used straight for a darker warm brown and is **one of our best sellers for Microblading as well as machine application!**

I also mix **Cocoa** with half Coffee Bean on a Fitzpatrick 4 and 5 and love the warmth it heals with.

Maintaining a dark, warm brown has always been challenging until **Cocoa, especially with smaller and tighter needle configurations.**

Cocoa can be added to many of the Face Ink eyebrow shades. Add a few drops to Moccasin or Sandalwood to deepen them, as well.

Cocoa for Lips!!!

Another application of **Cocoa is to line lips on a Fitzpatrick deep 4 or a 5.** It heals to a beautiful Cocoa shade. I use a larger needle configuration such as a 7-Liner with these darker complexions. However, I ***do not drag the color onto the interior or vermillion of the lip.*** This avoids the risk of bluing on the vermillion.

Face Inks colors are very heavily concentrated with pigment particles for thickness, not glycerin, so it can safely be diluted with a drop of distilled or sterile water.

On sale for \$25.00 each, regularly \$30.00.
